Editorial Preface

All Praise be to Allah SWT by whose Grace and Blessings, we can fulfill our deadline to publish volume 17, issue 1, of Jurnal Elektronika dan Telekomunikasi (JET). It is due to the dedicated efforts by our editors and reviewers that our journal can maintain the high quality and standards of paper. All the hard work has been rewarded with the accreditation given to JET by Indonesian Ministry of Research, Technology and Higher Education (Accreditation Number: **32a/E/KPT/2017**). In this issue, JET presented five original research articles covering topics in the fields of electronics, telecommunications, materials and microelectronics.

At the end of this preface, we would like to take the opportunity to extend our sincere acknowledgement to all the authors and readers of our journal for extending their kind support and cooperation which truly helped the journal to grow and become as successful as it is today.
